SUMMARY

Computer Science (Cyber Security) graduate with hands-on experience in Python, cloud security, and API development. Certified in Oracle Cloud Infrastructure DevOps and trained in SOC operations via Palo Alto Networks internship. Achieved a global top 2% rank in TCS CodeVita, demonstrating problem-solving and coding ability. Passionate about building projects that solves real world problems.

EDUCATION

BTech, Computer Science Engineering [Cyber Security] *Oct 2022 – Jul 2026*
IES College of Technology, Bhopal, MP, India - (CGPA: 7.95)

TECHNICAL SKILLS

Programming Languages: Python (primary), Java, JavaScript
Security & API Development: RESTful API development, React.js, Node.js, TailwindCSS; SIEM concepts, Network Firewalls, Threat Detection.
Database Management: OracleDB, MongoDB.
Productivity Tools: Git/GitHub, Visual Studio Code, Google Workspace.
DevOps & Cloud: AWS (EC2), Oracle Cloud Infrastructure (OCI), CI/CD pipelines, GitHub Actions, Vercel.
Relevant Coursework: Cyber Security, Cryptography & Network Security, Cloud Infrastructure, Data Structures, Computer Networks, Operating Systems, System Design, IOT.

WORK EXPERIENCE

Palo Alto Networks | Virtual Cybersecurity Intern *Jan 2025 – Mar 2025*

- Analyzed and mapped threat detection workflows in a SOC environment using **Prisma Access**; simulated incident responses to reduce time-to-detect and evaluate security control effectiveness.
- Applied iterative, Agile-based learning to work on security automation modules, improving understanding of real-time threat handling, sensor enrichment, and system-level security workflows.
- Developed Python-based network firewall simulations to diagnose vulnerabilities, document mitigation strategies, and evaluate cloud security controls, supporting proof-of-concept evaluations of detection and prevention capabilities.

PROJECTS

Rewindly | React, TailwindCSS | Youtube and Shazam APIs | [Live Demo](#) | [GitHub](#) *June 2025*

- Built a retro-style music player integrating RESTful APIs (Youtube & Shazam), handling 100+ API requests/session with smooth real-time, seamless playback across devices.
- Delivered a fully deployed application with frontend rendering, reducing load latency by ~20% and improving cross-device performance.

Peer Task | MERN Stack | [Live Demo](#) | [GitHub](#) *May 2025*

- Developed a MERN-based platform with RESTful API framework enabling peer-to-peer task exchange, real-time chat, and secure transactions; implemented CI/CD pipeline via GitHub and Vercel for automated deployment, reducing release cycle time.
- Designed scalable backend APIs and optimized database queries, achieving a 4.5/5 user satisfaction and smooth real-time performance.

Chronos AI | Next.js, TypeScript, React Flow, Gemini 2.5 Flash | [Live Demo](#) | [GitHub](#) *June 2026*

- Developed an AI-powered interactive knowledge exploration platform utilizing Google Gemini 2.5 Flash with structured JSON outputs and Next.js Route Handlers to dynamically synthesize complex topics into visual, explorable dashboards.
- Created dynamic system diagrams using React Flow with custom glowing nodes, animated connection lines, and a sidebar inspector, plus a "What-If" simulator for exploring alternate history paths

CERTIFICATIONS & ACHIEVEMENTS

Global Rank 4814 | TCS CodeVita Season 12

- [Ranked in the top 2% globally in TCS CodeVita Season 12](#)
- [Oracle Cloud Infrastructure DevOps Professional | ORACLE](#)
- [Cryptography & Network Security | NPTEL](#)
- [Ethical Hacking | EDUSKILL](#)
- [ISO/IEC 27001 Information Security Associate](#)

National Robotics Competition | Bronze Rank

- Led a team of 5 members to secure 3rd place among 20+ teams.
- Coordinated development tasks and resolved technical problems.
